

Logic Turn 303 will permit one or two way operations. Its electromechanical motor gives access to one or both sides free or locked in opposite ways and or controlled in both ways. Any combination of fail-lock or fail-safe is available.

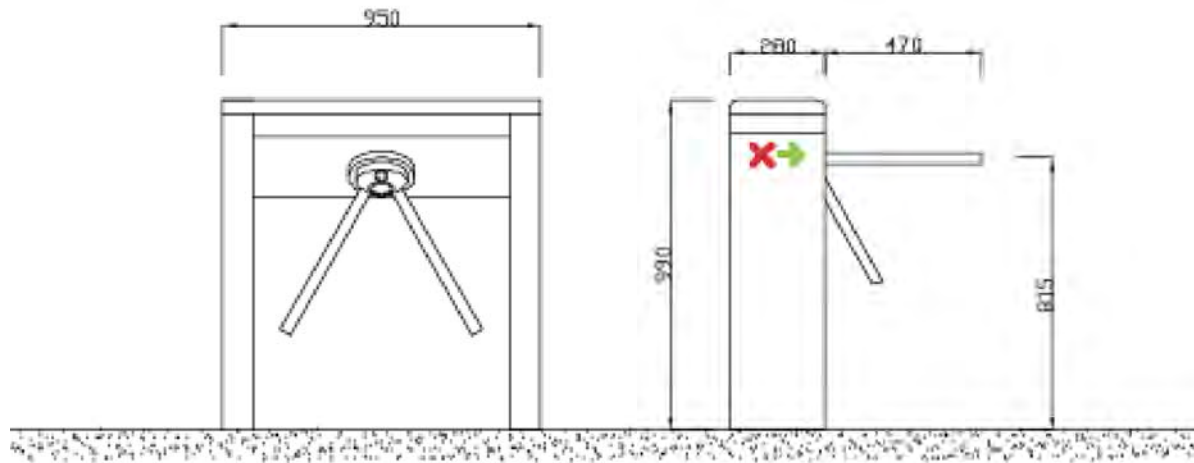

Model 303 is manufactured in stainless steel or painted steel for internal or external usage. They can be operated mechanically for simple exit only situations or electronically with push button control. These turnstiles are also ready to become part of sophisticated access control systems.

Drop-arm option is available for emergency situations.

Specifications:

- Operation of the turnstile is solved with self centering, heavy duty mechanism.
- All turnstiles are designed with one or two way operation
- Any combination of fail-lock or fail-safe is available
- All turnstiles are made for internal or external usage
- Rotation or home positioning is detected by switches
- All electrical voltage going through turnstile are lower than 24VDC for safety reasons.
- Electronic integrator control board
- Optional Hydraulics providing smoother operation.
- Drop Arm (Optional)
- Indicator lights (Optional)
- Special sized manufacturing (Optional)
