TURNSTILE PLUS

➤ **Turnstile Plus** is a data collector coupled with a turnstile forming a complete solution for automated access control. It is a modern equipment that allows data collection and also offers a physical barrier giving an extra security for your entrance. Perfect to be installed in any environment where you need access control, Turnstile Plus control with precision and security the transit of people.

Turnstile Plus is a perfect example to show how TURNSTILES.us is fully committed to a total systems philosophy, it is a single equipment that integrates an intelligent data collection system and a physical barrier for access control. In addition, Turnstile Plus have many access input options including: fingerprint verification, keypad entry, magnetic card, barcode card, proximity card, and contact less smart card. All the operation is guided by messages shown on LCD display and beeps emitted by a buzzer and all this features can be configured using software Inner's managers delivered with the hardware. A complete solution that includes also your satisfaction.
