

Vehicle Access Station

Introducing our **Vehicle Access Station**, designed for efficient vehicle access management. This system features a single gate with a driver-side access reader, allowing for easy entry or exit applications. It's powered by solar technology for reliable standalone performance.

This setup includes a single vehicle barrier with red/green LED boom arm, a gooseneck pedestal for the card reader, solar panels with electronics cabinet, and protective bollards, all on a portable base island for easy installation. Streamline your access control with this robust and convenient solution.
